## PRESS RELEASE

---

16 April 2018

### **Sweco helps improve safety in Poland's rail network**

**Sweco has been commissioned by PKP Polish Railway Lines to supervise safety improvements at railway level crossings throughout Poland. The order value is EUR 3.2 million.**

“This project comes with great responsibility and we are very pleased to have been selected by the customer and to be able to contribute to something that will improve safety in so many communities with level crossings and for rail passengers,” advises Maciej Chrzanowski, Managing Director, Sweco Consulting Poland.

The project concerns a total of 182 railway level crossings and includes not only the upgrade or introduction of safety devices at the crossings, but also the improvement of the road surface, allowing smoother passage.

The project is estimated to be finished in 2020.
